

## How to transfer BCR routes to the PTV Navigator

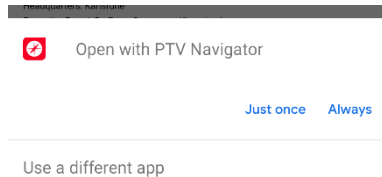

1. Using Email
2. Direct through Map&Guide internet

### 1. Transferring BCRs using an email client

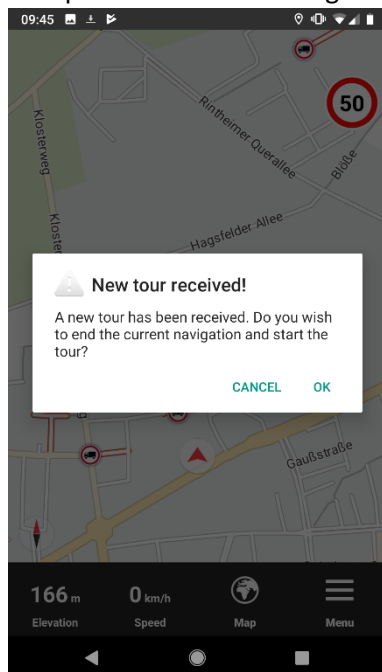

1. Export your bcr
2. Email it to the device of choice
3. Open the email client (in this case Gmail)

4. Click on the bcr file attached. Android will give you an option to open it in the navigator.

5. The navigator opens
6. Accept the tour in the navigator

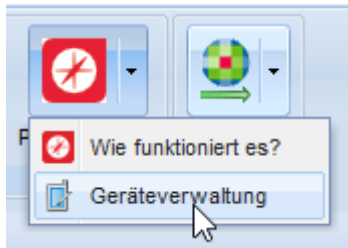

7. Confirm with ok.

## 2. Direct through Map&Guide Internet

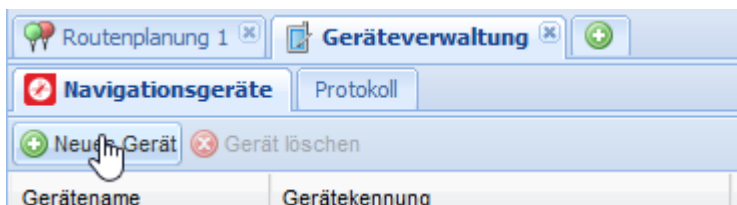

1. First step is to add the device.

Go to device administration:

2. Add new device

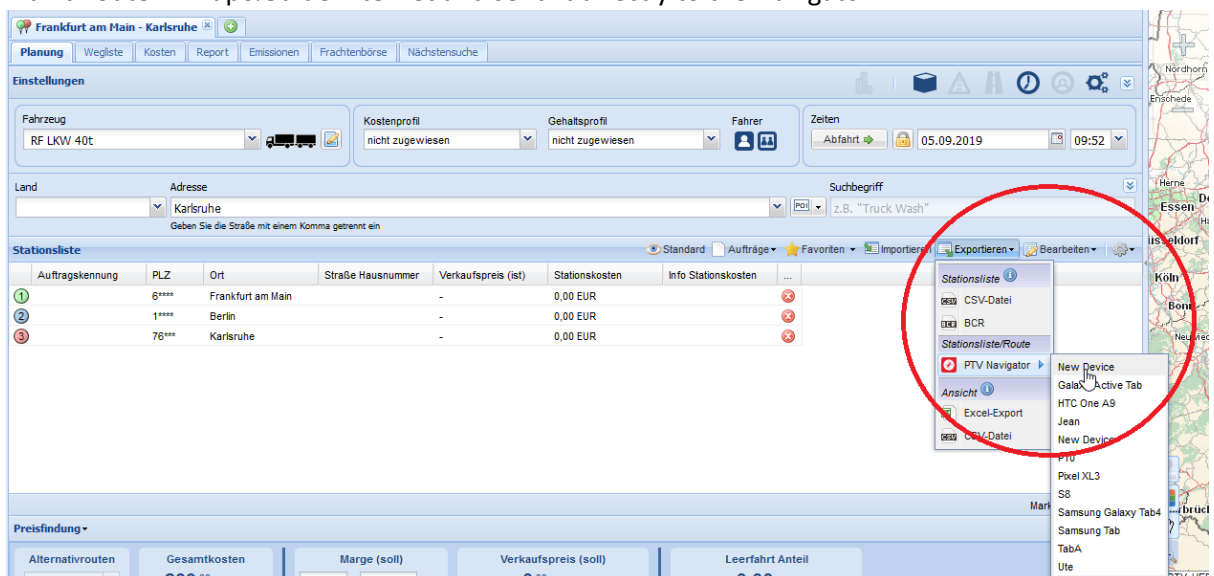

3. Enter device name and the Device ID

You will find the Device ID in the PTV Navigator under Menu -> System -> Device ID

4. Plan a route in Map&Guide Internet and send it directly to the Navigator.

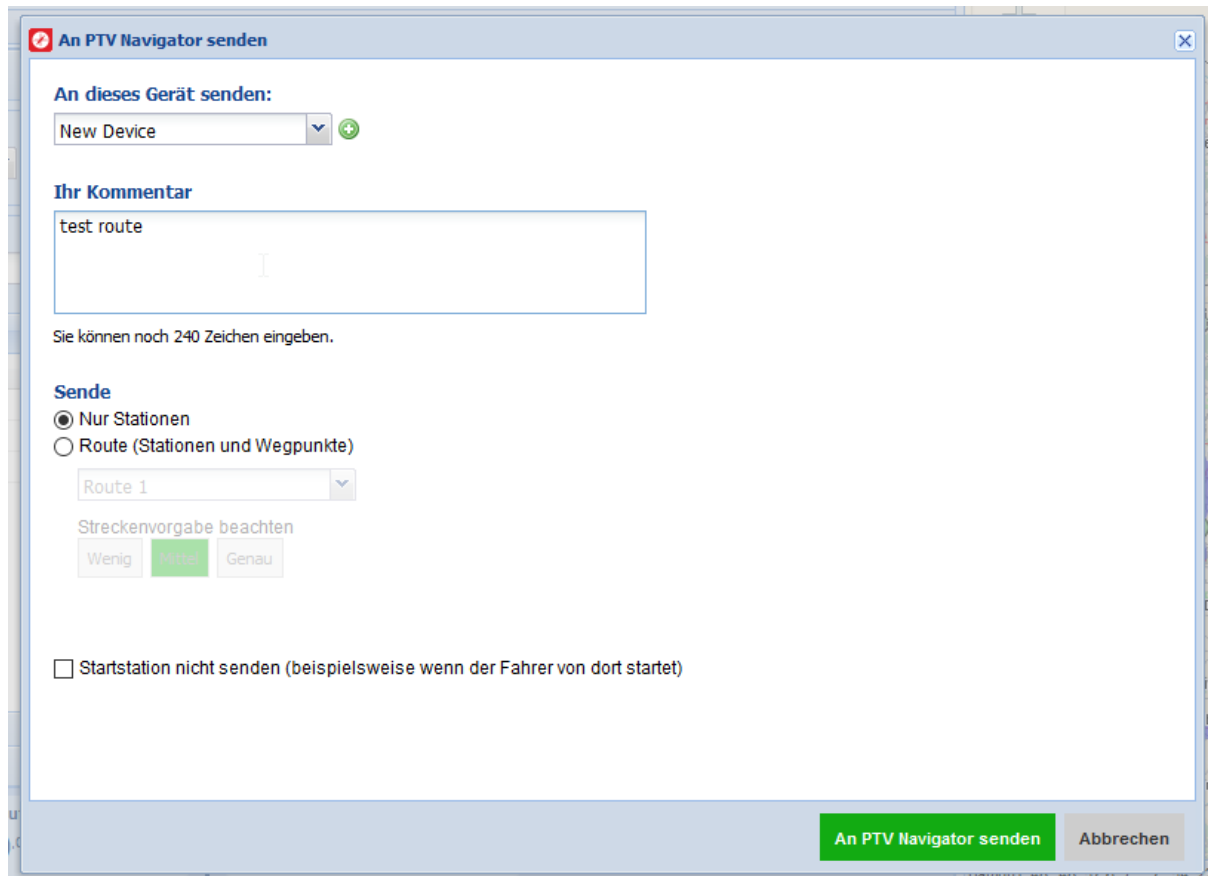

5. Choose your device, add a comment

select between only stations (Nur Stationen)  
or Route (Route (Stationen und Wegpunkte))

The difference is that “only stations” will just send the coordinates of the stations/destinations. The calculation will be done completely on device.

Route will send a Guided Navigation route to the device. The route course with all its details will be send as well.

The screenshot shows a web-based dialog box titled "An PTV Navigator senden". It contains the following elements:

- A dropdown menu labeled "An dieses Gerät senden:" with "New Device" selected and a green plus icon to its right.
- A text input field labeled "Ihr Kommentar" containing the text "test route". Below the field, it says "Sie können noch 240 Zeichen eingeben."
- A section titled "Sende" with two radio buttons: "Nur Stationen" (selected) and "Route (Stationen und Wegpunkte)".
- A dropdown menu below the radio buttons showing "Route 1".
- A label "Streckenvorgabe beachten" above three buttons: "Wenig", "Mittel" (highlighted in green), and "Genau".
- A checkbox labeled "Startstation nicht senden (beispielsweise wenn der Fahrer von dort startet)" which is currently unchecked.
- At the bottom right, there are two buttons: "An PTV Navigator senden" (green) and "Abbrechen" (grey).

In the last step go to: Send to PTV Navigator (An PTV Navigator senden).

6. On the PTV Navigator you will get a notification.  
You can either save the tour: you will find it in menu->navigation->my trips  
Or you can calculate it by clicking on yes
